Professional Profile

Dennis Suhanovs is a Senior Consultant for Flexecom. He has a broad experience base, which includes Windows 2000/2003 server products, deployment and design, domain migrations, Windows scripting and application programming experience. He is a published author and expert with Microsoft infrastructure.

Experience and Accomplishments

Dennis has been in the IT industry since 1996, specializing in Microsoft operating systems and server products such as Microsoft Exchange and Microsoft SQL Server. He received his first technology certification in 1997 and went on to achieve another seven over the course of several years, passing well over twenty exams.

Most recently Dennis has been engaged as a Microsoft technologist with publicly traded companies of national significance, being responsible for planning, implementing, and supporting production and corporate environments, designing and implementing disaster recovery strategies, creating and implementing custom server monitoring solutions and documenting newly implemented technology and processes along the way.

Dennis engages in software engineering projects, designing software applications and overseeing development process and/or actively participating in them. In addition to being a hands-on person, Dennis contracts with companies in educational space, developing courseware and reference material for printed and electronic media companies.
